SUMMARY

Telecommunications Engineer and Network Specialist with hands-on experience across copper, fiber, wireless, and VoIP networks. Holder of a Diploma in Telecommunications Engineering and multiple Cisco Networking Academy CCNA module badges. Recently upskilled in Artificial Intelligence (Cisco AI/LLM for Network Engineers) and Cloud Computing (Microsoft Azure Fundamentals) , with a strong focus on Network Automation using Python. Eager to apply AI-driven solutions to optimize network performance and predictive maintenance in a fast-moving AI environment.

WORK EXPERIENCE

Software Engineer , Omega Solutions — Apr 2025 - Apr 2026

- Developed and maintained web and mobile applications for retail POS and payment systems, ensuring compliance with tax reporting standards. Collaborated with cross-functional teams to integrate backend payment APIs, demonstrating strong data handling and API management skills applicable to AI-driven network systems.

Network Assistant , TelOne Zimbabwe — Nov 2024 – Apr 2025

- Installed, maintained, and repaired copper and fiber networks (ADSL, landline) for residential and business clients. Utilized network monitoring tools to analyze traffic data, identify potential points of failure, and improve overall network reliability. Deployed and maintained voice, data, video, and wireless infrastructure.

Technical Intern , TelOne Zimbabwe — Aug 2023 - May 2024

- Supported IT and network infrastructure projects, including installation, maintenance, and troubleshooting. Gained foundational experience in hardware/software maintenance, copper and fiber installation, and applied cybersecurity principles to protect network integrity.

EDUCATION

Diploma in Telecommunications Engineering — November 2024

TelOne Centre for Learning

CERTIFICATIONS

NETWORKING CERTIFICATIONS

- Cisco Networking Academy - CCNA: Switching, Routing, and Wireless Essentials
- Cisco Networking Academy - CCNAv7: Introduction to Networks
- Cisco Networking Academy - CCNAv7: Enterprise Networking, Security, and Automation
- EC-Council Cybersecurity

AI & CLOUD CERTIFICATIONS (Recent Upskilling)

- **Microsoft Azure Fundamentals (Cloud Concepts) – Microsoft Learn**
  Cloud Computing, Cloud Service Types, Benefits of Cloud Services, and Cost Management in Azure
- Understanding AI and LLMs as a Network Engineer – Cisco U.
- Introduction to Modern AI – Cisco Networking Academy

PROJECTS

Network Watchdog (Python Network Monitor)
Developed a Python-based telemetry tool that continuously monitors network uptime and detects anomalies. This project demonstrates foundational skills in automated data collection and log analysis, essential for AIOps and predictive network maintenance.

NetOps Scripts - Network Automation Toolkit
Created a suite of Python scripts (utilizing Netmiko) for automated ping sweeps, Cisco configuration backups, and interface monitoring. This toolkit reduces manual intervention and creates structured data logs suitable for future AI analysis.

SKILLS

Network & Cloud: Cisco Routing & Switching, Fiber Optics, VoIP, Wireless, Microsoft Azure (Fundamentals), Network Troubleshooting.
AI & Automation: Python (Netmiko, Network Automation), AI/LLM Concepts, API Integration, Linux, Git & GitHub.
Web Development: HTML5, CSS3, JavaScript, Responsive Design, Flutter.
Other: POS & Payment Systems, Solar Power Systems.
